

Champagne Glasses

Created by Lisa Shaw for Embrilliance

Designs for toasting celebrations of life and happiness such as the New Year, Weddings, Anniversaries and more.

Design information

1. Champagne and bubbles
2. Glass
3. Text created with Lettering object

Design Editing Information

1. Open the **HNY2019.BE** file in your Embrilliance Essentials software.
2. This design layout can be stitched in either a 5x7 or the 4x4 multi position hoop. For information on how to create a design layout for this hoop, [check out this youtube video](#) on the Embrilliance channel.
3. Select the lettering object to edit your text and change the font to any of your built in or BX fonts. The font used in this BE is Stuyvesant which is a built in font of Embrilliance Essentials.
4. If you are going to stitch this design in a single position hoop, with Embrilliance Essentials you will want to do a **Utility > Color Sort**. This will combine the colors of the champagne and glass resulting in a 3 color design.

Click on **New View** after choosing Color Sort to verify that the resulting sorted stitch file is what you want to have at the machine. If what you see is what you want, print a template (**File > Print**) and then go to **File > Save Stitch File** to save to the USB to put into the embroidery machine.
